

There's a new tabulator in town!

Your jurisdiction has selected VotingWorks to tabulate ballots at your next election. Change can be hard, but we think you're going to love your new VotingWorks tabulator.

Simple

- Use a black or blue ballpoint pen to fill in bubbles to select your choices.
- Insert your ballot into the purple slot. Any direction will work, just not sideways.
- Watch for the green checkmark on screen and listen for the chime: your ballot was counted!

Safe

- VotingWorks is tested to the latest federal security and accuracy standard.
- Paper folds and shadows are automatically filtered out, so only your marks count.

Transparent

- All software is publicly available for review. We think you have a right to know exactly how your votes are counted.
- If you have any question, we'll answer it directly. Email us at **voter@voting.works**
